## ICT Day Main objectives

1. Present the latest Technology and Communication innovations at the University.

2. Introduce the Information and Communications Technology Center (ICTC) and bring out its latest achievements during the recent years.

3. Official inauguration of the university academic portal (ALBAWWABA), showcasing the technical issues utilized in its design and implementation, as well as presenting the services it offers to QOU's students, faculty and staff.

4. Official Launch of E-courses prepared for Avicenna Virtual Campus Project.

5. Launch of multimedia courses produced by ICTC.

6. Inaugurate the EUro-MEDiterranean (EUMED) Connect project, which will be hosted at QOU, where its services will be distributed to all academic institutions in Palestine.

7. Direct the scientific research in the fields of ICT and E-learning to be readily available for the E-learning conference that will be held next year.

8. Help the students emerge with graduation-projects that best fit the needs of the Palestinian society as well as the local market.

9. Establish a link with the Palestinian governmental and non-governmental technological institutes, to unify efforts in order to wind up with a standard and unique future plans in this field.

10. Discuss the technological obstacles and tribulations facing Palestinian educational institutes that burden the overall ICT infrastructure.

11. Practice the ICTC slogan: "Towards E-University".
